CORE TECH STACK
Next.js 15 • FastAPI • PostgreSQL

✓ Executive Commitment & Engineering Alignment

Dear Ernso Pierre & The Nourbia Foods Leadership Team,

Thank you for your structured, comprehensive feedback. We fully share your vision: **Nourbia Foods is not merely building a static web store, but establishing an enterprise-grade digital commerce ecosystem** capable of scaling seamlessly across DTC e-commerce, cultural food boxes, wholesale B2B lead generation, bulk ingredient distribution, 5-language multilingual localization, and community-driven R&D.

This document serves as our binding **Functional Requirements Specification (FRS), Technical Architecture Blueprint, and Acceptance Criteria Charter**. It covers each of the **14 Proposal Modules** with granular workflows, data entities, admin capabilities, and objective completion criteria, followed by in-depth operational blueprints for the **Food Box Engine, B2B Hub, 50-State Fulfillment, "Taste • Test • Shape" Platform, Multilingual Engine, Admin Wireframes, Testing Protocols, and Itemized Third-Party Operating Costs**.

Agile Milestone Validation Protocol: We formalize the exact review sequence you requested: Sprint Build → Staging Deployment → Live Demonstration → Nourbia Team Testing & Verification → Defect Corrections → Formal Written Acceptance → Milestone Release.

Module 1: Custom Full-Stack Architecture, Cloud Infrastructure & DevOps Pipeline

30 Development Hours

EXACT FUNCTIONALITY INCLUDED

Next.js 15 App Router frontend architecture, Python FastAPI REST backend, PostgreSQL relational database, Redis cache/state engine, Docker containerization, automated GitHub Actions CI/CD staging/production pipelines, SSL/TLS, and domain configuration.

ADMINISTRATIVE FUNCTIONALITY

Health-check monitoring endpoints (/api/health), automated daily PostgreSQL backups, environment variable secret management via cloud console.

USER EXPERIENCE & WORKFLOW

Sub-second page loads (<0.8s LCP), zero layout shifts, continuous uptime, secure HTTPS encryption across all routes, automated error recovery pages (404/500).

DATA STORED & MANAGED

System logs, API audit trails, session stores in Redis, connection pool metrics, database migration history (Alembic).

OBJECTIVE ACCEPTANCE CRITERIA

- Next.js 15 and FastAPI services deployed inside Docker containers on staging server.
- Automated SSL certificates active with A+ security rating; PostgreSQL migrations execute cleanly with zero errors.
- Automated GitHub Actions pipeline triggers build and deploy on staging within <3 minutes of push.

Module 2: UI/UX Design System, Clean Harvest Right Aesthetic & Global Navigation

28 Development Hours

EXACT FUNCTIONALITY INCLUDED

Modern, product-first UI component library inspired by Harvest Right commercial aesthetic: high-contrast typography (Inter/Jakarta), brand color tokens (#0284c7, #0f172a, #10b981), sticky header, mega-navigation for Heritage Lines & Categories, and mobile drawer.

ADMINISTRATIVE FUNCTIONALITY

Admin can toggle navigation items, update announcement bar text (e.g., "Free Shipping over \$75"), and configure promo banners.

USER EXPERIENCE & WORKFLOW

Clean, intuitive browsing without clutter. Mega-menu displays visual category pills, cultural flags, food box links, B2B portal link, and community hub with 1-click access.

DATA STORED & MANAGED

Navigation hierarchy, announcement banner states, promo banners, theme token definitions.

OBJECTIVE ACCEPTANCE CRITERIA

- Mobile drawer and desktop mega-menu navigate smoothly without lag across all modern browsers (Chrome, Safari, iOS Safari, Android Chrome).
- Design matches Harvest Right-grade commercial clarity, visual hierarchy, and accessibility contrast standards (WCAG AA).

Module 3: Homepage, Interactive Mission & Brand Storytelling Engine

26 Development Hours

EXACT FUNCTIONALITY INCLUDED

Dynamic Hero section with dual CTAs ("Explore Products" / "Partner With Us"), Interactive 6-step service module ("Source → Process → Preserve → Develop → Package → Distribute"), Freeze-drying science showcase (25-year shelf-life, 97% nutrient retention), and Cultural Provenance story ("Prove • Build • Scale").

ADMINISTRATIVE FUNCTIONALITY

Admin can edit hero headlines, replace hero photography, update mission bullet points, and select which featured products/boxes appear on the homepage.

USER EXPERIENCE & WORKFLOW

Engaging scroll-driven storytelling. Interactive modules expand on hover/click to explain Nourbia's preservation standards and cultural mission.

DATA STORED & MANAGED

Homepage content blocks, featured product IDs, customer testimonial quotes, preservation stat counters.

OBJECTIVE ACCEPTANCE CRITERIA

- All 6 interactive service modules expand and animate cleanly on both mobile touch and desktop cursor hover.
- Admin changes to hero copy and featured products reflect on homepage in real time without code deployment.

Module 4: Cultural Product Catalog & Faceted Search Engine

32 Development Hours

EXACT FUNCTIONALITY INCLUDED

Multi-dimensional catalog supporting 20–40 launch SKUs. Faceted filtering by Cultural Heritage (Haitian, African, Latin American, Caribbean), Category (Fruits, Vegetables, Fish/Proteins, Seasonings, Staples, Prepared, Snacks), Dietary attributes (Gluten-Free, Halal, Vegan, Non-GMO), and Price Range with dynamic sorting.

ADMINISTRATIVE FUNCTIONALITY

Admin creates categories, assigns heritage tags, sets SKU availability, manages product pricing, uploads high-res photography, and toggles active/inactive display states.

USER EXPERIENCE & WORKFLOW

Instant filter responses (<100ms) with clean URL query parameters for SEO; quick-view product modal, badge indicators (e.g., "Authentic Haitian", "25-Yr Shelf Life").

DATA STORED & MANAGED

Products, SKUs, category hierarchies, heritage tags, dietary flags, price history, stock status.

OBJECTIVE ACCEPTANCE CRITERIA

- Filtering simultaneously by Cultural Heritage + Category + Dietary tags accurately narrows down products with zero page reloads.
- Products marked "Out of Stock" display clear waitlist/inquiry badges and disable direct add-to-cart.

Module 5: Product Detail Pages (PDP), Nutrition Facts & Rehydration Guides

28 Development Hours

EXACT FUNCTIONALITY INCLUDED

Harvest Right-inspired PDP layout: multi-angle zoomable gallery, interactive Nutrition Facts Panel (FDA compliant format), allergen declarations, 25-Year shelf life badge, Preparation & Rehydration Water-Ratio Guide (e.g., "Add 1 Cup boiling water, wait 8 mins"), and related cultural pairings.

ADMINISTRATIVE FUNCTIONALITY

Admin inputs calories, macros, serving size, net weight, water-to-product ratio, rehydration time, ingredients list, and allergen checkboxes via Admin Panel.

USER EXPERIENCE & WORKFLOW

Customer reads exact culinary provenance, reviews rehydration instructions, selects quantity, views bulk-savings badges, and clicks "Add to Cart".

DATA STORED & MANAGED

Product specifications, nutrition facts data table, rehydration formulas, gallery image URLs, cross-sell product relations.

OBJECTIVE ACCEPTANCE CRITERIA

- Nutrition facts panel renders cleanly formatted according to FDA structure across mobile and desktop.
- Rehydration instructions and allergen badges display accurately for every SKU.

Module 6: Curated & Cultural Nourbia Food Box Engine

30 Development Hours

EXACT FUNCTIONALITY INCLUDED

Comprehensive Food Box Configurator supporting 3 Box Tiers (Individual/Personal, Family, Multi-Family) across 4 Cultural Heritage Profiles (Haitian, Caribbean, Latin American, West African). Transparent Itemized Manifest showing exact included SKUs, net weight, servings, and price.

ADMINISTRATIVE FUNCTIONALITY

Admin creates new box profiles, edits SKU allocations per box tier, sets custom box bundle pricing, defines slot replacement rules, and manages out-of-stock substitutions.

USER EXPERIENCE & WORKFLOW

Customer selects Heritage Profile → chooses Box Tier → views transparent itemized breakdown (e.g., "12 Meals • 3.2 lbs • \$89.00") → optional slot-swap within designated category constraints → adds to cart with 1 click.

DATA STORED & MANAGED

Box templates, tier configurations, SKU slot allocation rules, net weight calculations, serving counts, bundle discounts.

OBJECTIVE ACCEPTANCE CRITERIA

- All 12 combinations (3 Tiers x 4 Cultural Profiles) generate accurate itemized manifests, servings, and prices.
- Adding a Food Box to cart properly stores all bundled items and passes accurate total weight to shipping rate engine.

Module 7: Slide-Out Cart Drawer, Multi-Step Checkout & Customer Accounts

36 Development Hours

EXACT FUNCTIONALITY INCLUDED

Persistent slide-out cart drawer supporting single SKUs and food boxes; real-time line-item quantity edits, coupon code validation engine, shipping threshold progress bar ("Add \$15 for Free Shipping"), mobile-optimized multi-step checkout (Guest & Account), Google Places address autocomplete, and customer portal.

ADMINISTRATIVE FUNCTIONALITY

Admin views customer account profiles, order histories, active cart abandonment stats, and manages promotional coupon rules.

USER EXPERIENCE & WORKFLOW

Frictionless drawer opens without navigating away; 1-thumb checkout on mobile; customer account shows real-time order history, tracking links, and saved addresses.

DATA STORED & MANAGED

User profiles, encrypted passwords (bcrypt), saved delivery addresses, active carts, coupon redemption records.

OBJECTIVE ACCEPTANCE CRITERIA

- Cart drawer persists across page reloads without losing items; coupon discounts apply correctly to eligible SKUs.
- Guest checkout seamlessly completes order; customer can opt to create account with 1 click on confirmation page.

Module 8: Secure Payment Gateway Integration (Stripe Elements & Digital Invoices)

26 Development Hours

EXACT FUNCTIONALITY INCLUDED

Stripe Elements integration supporting Credit/Debit Cards, Apple Pay, Google Pay; server-side PaymentIntent orchestration, webhook state machine, duplicate-charge idempotency keys, payment failure inline error recovery, and automated PDF invoice generator.

ADMINISTRATIVE FUNCTIONALITY

Admin views payment status (Paid, Failed, Refunded), transaction IDs, initiates partial/full refunds directly from Admin Dashboard.

USER EXPERIENCE & WORKFLOW

Instant 1-click payment with Apple Pay / Google Pay; inline card validation with zero redirects; instant order success screen with printable digital receipt.

DATA STORED & MANAGED

Stripe PaymentIntent IDs, transaction status, payment method type (Card/ApplePay), payment webhook event logs (Zero raw card numbers stored).

OBJECTIVE ACCEPTANCE CRITERIA

- Successful test payments in Stripe Test Mode trigger instant order creation and transition status to Paid.
- Duplicate network submissions do not cause double billing (validated via idempotency keys).

Module 9: Shipping Matrix, 50-State Fulfillment & Order Lifecycle

28 Development Hours

EXACT FUNCTIONALITY INCLUDED

50-State US shipping rate calculation matrix, ShipStation API integration, multi-carrier support (USPS Priority, UPS Ground, FedEx), Alaska/Hawaii/APO surcharge rules, automated thermal 4x6 label generation, tracking number injection, and return/replacement tracking.

ADMINISTRATIVE FUNCTIONALITY

Admin clicks "Create Label" in order view to generate PDF thermal shipping label and packing slip; orders automatically transition from Processing to Shipped.

USER EXPERIENCE & WORKFLOW

Customer selects shipping speed during checkout; receives automated dispatch email with live clickable carrier tracking URL.

DATA STORED & MANAGED

Shipping rates, weight calculation rules, tracking numbers, carrier labels (PDF), carrier shipment status logs.

OBJECTIVE ACCEPTANCE CRITERIA

- Live rate calculation or configured tiered matrix accurately returns rates for continental US and Alaska/Hawaii addresses.
- Generating label successfully stores tracking code and triggers dispatch notification email with valid carrier link.

Module 10: For Business / B2B Partner Inquiries & Lead Routing Engine

20 Development Hours

EXACT FUNCTIONALITY INCLUDED

Dedicated "For Business" Hub supporting 5 commercial channels: Retail, Wholesale, Food Service, Private Label, Bulk Ingredients. Comprehensive RFQ submission form with file/spec upload, instant digital Line Sheet PDF download engine, and automated sales lead notification routing.

ADMINISTRATIVE FUNCTIONALITY

Admin reviews incoming B2B leads, filters by business type (Wholesale, Private Label, Food Service), tracks lead status (New → Contacted → Qualified → Closed), and exports lead CSVs.

USER EXPERIENCE & WORKFLOW

B2B buyers review commercial capabilities, download digital product catalog PDF instantly upon entering business email, or submit RFQ with volume specs.

DATA STORED & MANAGED

Company name, contact person, business email, phone, annual volume estimates, channel type, uploaded spec documents, lead status notes.

OBJECTIVE ACCEPTANCE CRITERIA

- Submitting RFQ form triggers immediate email notification to Nourbia sales inbox and securely logs lead in Admin CRM.
- Digital Line Sheet PDF downloads instantly upon verified business form submission.

Module 11: Customer & Community "Taste • Test • Shape" Operational Platform

18 Development Hours

EXACT FUNCTIONALITY INCLUDED

Interactive Community Co-Creation Hub: Cultural Food Request form ("Tell us the cultural dishes you miss"), Structured Flavor & Authenticity Feedback ratings (1–5 stars on Authenticity, Rehydration Texture, Taste), SKU Wishlist suggestion engine, and admin demand aggregation reports.

ADMINISTRATIVE FUNCTIONALITY

Admin reviews feedback submissions, aggregates cultural demand rankings (e.g., "#1 Requested: Haitian Diri ak Djon Djon"), and exports R&D demand reports.

USER EXPERIENCE & WORKFLOW

Customers actively participate in food innovation, vote on proposed cultural recipes, submit product ideas, and provide verified review feedback.

DATA STORED & MANAGED

Community suggestions, cultural origin tags, authenticity ratings, feedback comments, customer votes, R&D demand tallies.

OBJECTIVE ACCEPTANCE CRITERIA

- Customer can submit cultural food requests with dish name, cultural origin, and key ingredients.
- Admin dashboard aggregates feedback and ranks requested dishes by community interest and frequency.

Module 12: Comprehensive Administration Dashboard & Operations Console

38 Development Hours

EXACT FUNCTIONALITY INCLUDED

Complete self-service Admin Web Portal: Product & SKU management, Inventory stock controls, Nutrition facts manager, Food Box bundle editor, Live Order processing console, 1-Click packing slips, Tracking assignment, Customer accounts manager, Coupon creator, and Sales reports with CSV/PDF exports.

ADMINISTRATIVE FUNCTIONALITY

Role-based access (Admin, Fulfillment Manager), comprehensive CRUD across all catalog, orders, customers, coupons, and content entities.

USER EXPERIENCE & WORKFLOW

Nourbia staff manage 100% of day-to-day operations with zero developer dependence; fast search, bulk product status toggles, and visual sales graphs.

DATA STORED & MANAGED

Staff user credentials, access permissions, audit logs, catalog datasets, order transaction records, export job histories.

OBJECTIVE ACCEPTANCE CRITERIA

- Admin can create a new SKU, upload photos, set nutrition specs, and publish it live without developer assistance.
- Orders can be filtered by status (Pending, Paid, Shipped), printed as packing slips, and exported to CSV.

Module 13: Multilingual Framework (5 Languages) & Internationalized SEO Engine

28 Development Hours

EXACT FUNCTIONALITY INCLUDED

Full 5-language localization: English (EN), Haitian Creole (HT), French (FR), Spanish (ES), Portuguese (PT). Language switcher in header/footer, localized routing (/ht/.../fr/...), admin database translation fields for products and food boxes, multilingual transactional emails, and hreflang SEO meta tags.

ADMINISTRATIVE FUNCTIONALITY

Admin inputs localized titles, descriptions, and preparation guides per language directly in the product/box editor; static UI labels managed via central dictionary.

USER EXPERIENCE & WORKFLOW

Instant language toggle preserves current page context; customers browse products, rehydration instructions, and checkout in their native cultural language.

DATA STORED & MANAGED

Localized product copy tables, language preference cookies, i18n translation dictionary files, multilingual sitemaps.

OBJECTIVE ACCEPTANCE CRITERIA

- Switching between English, Haitian Creole, French, Spanish, and Portuguese correctly updates all UI text, product descriptions, and navigation.
- Search engine bots receive valid hreflang alternate tags and localized XML sitemaps for all 5 languages.

EXACT FUNCTIONALITY INCLUDED

End-to-end regression testing, cross-device mobile/tablet/desktop verification, payment webhook load testing, OWASP Top 10 security audit (SQL injection, XSS, CSRF, rate-limiting), production cloud provisioning in Nourbia's accounts, DNS/SSL handover, and staff operational training.

ADMINISTRATIVE FUNCTIONALITY

Nourbia team receives complete administrative training session (recorded video) and operational handbook.

USER EXPERIENCE & WORKFLOW

Flawless, bug-free launch with zero transaction drop-offs and rock-solid mobile responsiveness.

DATA STORED & MANAGED

Automated test suites (PyTest, Playwright/Cypress), security scan reports, deployment checklists.

OBJECTIVE ACCEPTANCE CRITERIA

- All automated test suites pass with 100% success; zero critical or high-severity vulnerabilities in security scan.
- Staging UAT sign-off completed by Erns0 Pierre prior to official DNS cutover to live production domain.

Detailed Resolution of Key Stakeholder Queries

The Food Box Engine is designed as a core revenue driver, allowing Nourbia to bundle culturally resonant, high-margin freeze-dried SKUs into convenient multi-meal boxes:

```
FOOD BOX ORDER & INVENTORY ALLOCATION WORKFLOW: Customer selects: [Haitian Heritage Box - Family Tier]
($119.00 • 20 Servings) | ▼ System Validates Real-Time Inventory for Bundled SKUs: └ SKU-HT-01 (Diri ak
Djon Djon): [IN STOCK - 42 units available] → Allocated └ SKU-HT-04 (Griot Pork Cubes): [IN STOCK -
18 units available] → Allocated └ SKU-HT-08 (Pikliz Seasoning): [OUT OF STOCK] ───────────────────→
Automated Substitution Engine: └ Option A: Auto-swap with pre-defined equal substitute (SKU-HT-09) └
Option B: Customer prompted with 1-click alternative selection | ▼ Dynamic Box Manifest Generated →
Added to Cart Drawer as Single Bundle Entity with Child SKU Pick-List
```

2.2 B2B & Wholesale Partner Hub Architecture

B2B Commercial Channels Covered

- **Retail & Supermarkets:** Branded cultural retail pouch distribution.
- **Wholesale Distributors:** Case-pack purchasing and pallet pricing.
- **Food Service & Restaurants:** Commercial kitchen freeze-dried bulk ingredients.
- **Private Label & Co-Packing:** Custom recipe freeze-drying and white-labeling.
- **Bulk Ingredients & NGOs:** Disaster relief, institutional cultural food boxes.

Operational Lead-to-Sale Workflow

- **Instant Line Sheet PDF Download:** Buyer inputs email/company → Instant spec sheet download → Lead logged in Admin CRM.
- **Custom RFQ Submission:** Upload custom specs, target volume, and delivery timeline requirements.
- **Automated Lead Routing:** Real-time alert dispatched to epierre@nourbiafoods.com and sales team.
- **Future Ready:** Database schema includes `is_b2b_approved` and `wholesale_tier` flags ready for future password-protected B2B wholesale checkout.

2.3 End-to-End Shipping & 50-State Fulfillment Lifecycle

COMPLETE ORDER FULFILLMENT & LIFECYCLE STATE MACHINE: [Customer Places Order] → [Stripe Authorizes & Captures Payment] | ▼ Webhook Updates Status to 'Paid' [Order Appears in Admin Dispatch Console] | ▼ Staff clicks 'Print Packing Slip' & 'Create Shipping Label' [ShipStation API Generates 4x6 Thermal Label & Tracking Code] | ▼ Status transitions to 'Shipped' [Automated Customer Email Dispatched with Carrier Tracking URL] | ▼ Webhook receives Carrier Delivery Event [Order Status Marked 'Delivered' • Review Request Sent]

Shipping Rate Calculation Engine: Supports both **Live Carrier Rates** (via ShipStation / EasyPost lookup for USPS Priority, UPS Ground, FedEx) and **Configurable Rule Matrix** (e.g., Free Shipping on orders >\$75 in continental US; \$14.99 flat surcharge for Alaska, Hawaii, and military APO/FPO addresses).

2.4 "Taste • Test • Shape" Operational Co-Creation Hub

Rather than a passive feedback form, this module functions as an active R&D demand aggregation engine:

- **Cultural Flavor & Dish Submissions:** Diaspora community members submit missing cultural dishes, specifying cultural provenance, traditional spices, and dietary preferences.
- **Structured 3-Point Sample Evaluation:** Verified customers review sample batches across 3 structured dimensions: *Authenticity Score (1-5)*, *Rehydration Texture & Ease (1-5)*, and *Overall Flavor (1-5)*.
- **Admin R&D Prioritization Matrix:** Admin dashboard aggregates submissions into a prioritized demand leaderboard (e.g., "Top 5 Caribbean Requests this Month"), providing empirical market data before Nourbia commits to commercial production runs.

2.5 Administration Dashboard Layout & Operational Independence

The Admin Dashboard is engineered for complete operational autonomy. Nourbia staff will manage all aspects of products, prices, food boxes, inventory, orders, coupons, and content without requiring technical support:

ADMINISTRATION DASHBOARD CONCEPTUAL WIREFRAME:

FOODS™ Operations Console [Search SKU / Order...] Ernso (Admin) |

Dashboard | TODAY'S OVERVIEW | | Products | Sales: \$4,280.00 | Orders: 34 | Pending Shipments: 8 | B2B RFQs: 3 | | Food Boxes |

Live Orders | RECENT ORDERS (DISPATCH CONSOLE) | | Customers | Order #1042 • Pierre E. • 1x Haitian Family Box • \$119.00 • [Create Label] | | B2B Leads | Order #1041 • Marie K. • 2x Griot Pork SKUs • \$38.00 • [Print Slip] | | Community R&D |

Coupons | QUICK CATALOG & INVENTORY CONTROLS | | Languages | [+ Add New Product] [+ Configure Food Box] [Export Sales CSV] | | Settings | Active SKUs: 32 | Out of Stock: 2 | Total Registered Customers: 418 |

Page 9 of 11

2.6 Multilingual Architecture & Internationalized SEO

To honor Nourbia's mission of serving diverse cultural diaspora communities, the platform provides comprehensive native localization across 5 target languages:

LANGUAGE	LOCALE CODE	URL ROUTING STRUCTURE	TRANSLATION MANAGEMENT
English (Primary)	en-US	nourbiafoods.com/products/...	Default database fields & UI dictionary.
Haitian Creole (Kreyòl)	ht-HT	nourbiafoods.com/ht/products/...	Dedicated localized DB columns in Admin Console.
French	fr-FR	nourbiafoods.com/fr/products/...	Dedicated localized DB columns in Admin Console.
Spanish	es-US	nourbiafoods.com/es/products/...	Dedicated localized DB columns in Admin Console.
Portuguese	pt-BR	nourbiafoods.com/pt/products/...	Dedicated localized DB columns in Admin Console.

Multilingual SEO Implementation: Every product and food box page automatically renders canonical `<link rel="alternate" hreflang="ht" href="...">` tags and submits localized multi-language XML sitemaps to Google Search Console to rank natively in Creole, French, Spanish, Portuguese, and English.

2.7 Comprehensive Quality Assurance & Acceptance Testing Charter

Our quality assurance program guarantees enterprise stability prior to public launch, leveraging the **40 Complimentary QA Hours** included in the engagement:

TESTING DOMAIN	VERIFICATION SCOPE & METHODOLOGIES	PASS / ACCEPTANCE CRITERIA
1. Payment & Checkout	Stripe 3D-Secure cards, Apple Pay, Google Pay, failed card error handling, duplicate click prevention, webhook event verification.	100% accurate charge authorization, zero duplicate charges, instant PDF invoice generation.
2. Shipping & Labels	Live ShipStation carrier rate lookup, weight aggregation of single SKUs + multi-item food boxes, APO/FPO and AK/HI address rules.	Thermal 4x6 label generated with valid tracking code and dispatched via automated email.
3. Cross-Device Responsive	Testing across real physical devices: iPhone (Safari), Android (Chrome), iPad/Tablet, Mac/Windows Desktops (Chrome, Edge, Safari, Firefox).	Fluid touch targets (>48px), zero horizontal scrolling, fast <1.0s page renders.
4. Multilingual Integrity	Verifying full translation continuity across all 5 languages during PDP browsing, Cart, Checkout, and Order confirmation emails.	Zero missing translation keys (no fallback error strings visible to customer).
5. Security & Penetration	OWASP Top 10 automated vulnerability scanning, SQL injection protection, XSS sanitation, rate limiting on auth and RFQ forms.	Zero Critical or High severity security vulnerabilities identified.

2.8 Itemized Third-Party Operating Costs & Environment Infrastructure

Below is the complete, transparent breakdown of external operating costs outside the \$6,000 ITPrior development investment. As recommended, we configure a **Cost-Optimized Cloud Architecture** to minimize monthly overhead while maintaining

enterprise performance:

SERVICE & PROVIDER	PURPOSE & SCOPE	ESTIMATED MONTHLY COST	BILLING RELATIONSHIP
Cloud VPS Hosting DigitalOcean / Hetzner	Docker containers, Next.js 15 SSR, FastAPI Backend, Redis Cache & PostgreSQL DB	\$12.00 – \$24.00 / mo	Billed directly to Nourbia's cloud card
ShipStation Integration ShipStation API	Multi-carrier shipping rates, USPS/UPS/FedEx label printing & tracking sync	\$9.99 / mo (Starter Tier: up to 50 shipments)	Billed directly to Nourbia
Transactional Email SendGrid / Postmark	Order confirmation emails, tracking notifications, B2B lead alerts	\$0.00 – \$15.00 / mo (Free tier covers first 3,000 emails)	Billed directly to Nourbia
Stripe Payment Gateway Stripe Inc.	Credit/Debit cards, Apple Pay, Google Pay merchant processing	2.9% + \$0.30 per successful transaction (No monthly fee)	Deducted automatically per sale
SSL & Global CDN Cloudflare	DDoS protection, Edge CDN caching, SSL encryption certificate	\$0.00 / mo (FREE) (Standard Cloudflare Tier)	Free tier included
Address Autocomplete Google Maps API	Checkout address autocomplete & validation	\$0.00 / mo (Covered under Google's \$200 free monthly credit)	Direct Google account
Domain Registration GoDaddy / Namecheap	Domain registration for nourbiafoods.com	~\$15.00 / year	Nourbia existing asset
ESTIMATED TOTAL MONTHLY OPERATING EXPENSE		~\$35.00 – \$55.00 / month	

2.9 100% Intellectual Property & Source Code Ownership Charter

Binding Ownership Guarantee: Upon final milestone settlement, **100% of the entire platform intellectual property transfers unconditionally to Nourbia Foods Inc.** This includes all Git source code repositories (Next.js frontend, FastAPI backend), PostgreSQL schema scripts, Docker configuration files, CI/CD deployment pipelines, and OpenAPI documentation. All production servers, Stripe accounts, ShipStation accounts, and DNS domains remain strictly in Nourbia's name with zero vendor lock-in. Nourbia retains the full legal and technical freedom to maintain, modify, or transfer development to any internal or external engineering team in the future.

PREPARED & SUBMITTED ON BEHALF OF ITPRIOR SOLUTIONS	ACCEPTED & CONFIRMED ON BEHALF OF NOURBIA FOODS INC.
